

Your reliable timber door
and window company

Welcome to the world of quality timber windows and doors, tailor-made by our craftsmen to help turn your dreams of a perfect home into reality.

The team of craftsmen joiners at Dando Doors and Windows have been supplying Auckland home owners with custom made timber joinery for more than 20 years. Initially focusing on creating tailored joinery solutions for clients renovating older homes, it didn't take long for word to spread that you could "Trust Dando" to provide a quality product backed by friendly, reliable service.

Today the team has grown to eighteen. So too has the range and styles of joinery to encompass homes of virtually any style, from classic villas and bungalows, to streamlined modern design.

At Dando we choose to use Western Red Cedar for all our doors and sashes. This hard-wearing softwood has a remarkably fine and stable grain structure that won't warp or twist, ensuring years of reliable opening and closing. And for our frames we use long lasting Radiata Pine. Other timber options are available to suit your design.

As a member of the Master Joiners we are committed to quality. All our products come with a 5 year warranty against defects in material and workmanship.

This brochure has been designed to give you a taste of the range of styles available and explain the benefits of using timber joinery for your home. The options are virtually limitless.

TIMBER - A GREAT INSULATOR WITH TIMELESS GOOD LOOKS

Timber joinery brings both flair and functionality to your windows and doors. The naturally elegant profiles can be crafted to suit your style of home. You can have them stained to enhance their warm earthy tones, or painted to complement your décor.

Properly finished and maintained, you can expect decades of trouble-free operation from your windows and doors.

Timber not only looks good, it works well too. It's a natural thermal insulator. In fact, tests show that heat loss through timber window frames is significantly less than for a standard aluminium frame. Timber helps to keep your home cool in summer and warm in winter – and reduces your cooling and heating costs.

With changes to the Building Code stressing greater energy efficiency and insulation, timber is your logical choice. The Code now requires vertical glazing in homes to have an RValue rating of 0.26.

	THERMAL PERFORMANCE FOR STANDARD WINDOW SYSTEMS		
	APPROXIMATE R-VALUE (M ² K/W)		
	SINGLE GLAZED	LOW E LAMINATE	DOUBLE GLAZED
Timber	0.19	0.27	0.36
Aluminium	0.15	0.22	0.26

CHOOSING THE RIGHT GLAZING

Depending on where your windows and doors are located, the glazing type and options available can vary.

We're happy to advise you on the best solutions and can arrange to have your joinery glazed in our showroom before delivery, or on site to suit. Options include:

- Single Glazing
- Obscure Glazing
- Safety Glass
- Bevelled and Leadlight Glass
- Sandblasted Glass
- Low E Laminate Glass (Insulation Value of R 0.27)
- Double Glazing (Insulation Value of R 0.36)

PRIMING

As an option we can supply all external joinery coated with an oil-based primer, ready to paint.

HANDLES, CATCHES & LOCKS - THE FINISHING TOUCH

We can source handles, locks and catches for that final touch in creating the look you're after. These can be pre-fitted to your windows and doors, or simply supplied for you to attach yourself. Thanks to bulk buying agreements we have with a range of suppliers, we can offer you a discount on your hardware when you order your windows and doors through us.

HOW TO GET AN OBLIGATION-FREE QUOTE

1. Decide on the size and style of joinery you want. You can choose from our existing product range or create your own design.
2. Then either fax, email or post your sketches or plans to us. Or you may prefer to visit our showroom for an obligation-free discussion.
3. We'll review your details, call you if we need to clarify anything and then come back to you with an itemised quotation.
4. If you'd like to proceed with the job, simply sign the quote, highlighting what options you'd like, and return this to us with your deposit.
5. We can help you with confirming your final measurements on-site if necessary.
6. It generally takes about three weeks to manufacture your doors and windows.

VISIT OUR SHOWROOM

Our showroom on Stoddard Road features all of our windows and doors in large, working displays. It's a great way for you to see first-hand how each product works. You can feel the quality of the timber and see the range of styles available. It's much easier than trying to visualise it all on a plan.

And for those times when you can't wait for your doors and windows to be custom-made, we stock a large selection of popular styles for immediate purchase.

Exterior Doors

ENTRANCE

FRENCH / BIFOLD / SLIDING DOOR OPTIONS

Choose a door style to insert into your choice of frames shown on pages 7 to 9.

Bifold Doors

Bifold Doors allow you to open your living and family areas with a flourish and make the most of decks and patios. Why not include a hinged door - it provides easy access on those blustery days when the Bifolds are snugly shut.

FRAME OPTIONS Refer to page 6 for additional door styles to include in these frames.

Sliding Doors

Sit back and enjoy the stunning vistas through your Sliding Doors. They're the logical choice for linking indoor and outdoor living areas or to use where space prevents the use of a Bifold Door.

FRAME OPTIONS Refer to page 6 for additional door styles to include in these frames.

French Doors

French Doors are an elegant addition to any home. Use them for kitchens, living areas or bedrooms that open out onto balconies. The rich, natural look of timber complements the classic styling.

Windows

AWNING WINDOWS

Awning Windows are great for use in areas exposed to the wet weather. They work well in elevated positions or where foot traffic is light.

AW1

AW2

AW3

AW4

CASEMENT WINDOWS

These classics look great in the traditional villas and bungalows. Like Awning Windows, they are better suited to areas where foot traffic is light.
